

HARIHARAN R

FULL STACK DEVELOPER

+91 8825841617 | ✉ hariharanhrin@gmail.com | 📍 Puducherry, India
GitHub: <https://github.com/hari1614> | LinkedIn: <https://www.linkedin.com/in/hariharan-fullstack>

PROFESSIONAL SUMMARY

Full Stack Developer with **2+ years of experience** building scalable web applications and SaaS platforms using modern JavaScript technologies. Experienced in developing **ERP systems, AI-powered applications, and subscription-based platforms** aligned with real-world business workflows.

Skilled in working across the entire development lifecycle, from **system design and development to deployment and performance optimization**, including frontend engineering, backend architecture, API integration, and database design.

Hands-on experience with **multi-tenant systems, payment integrations, AI-driven solutions, and cloud-based deployments**. Passionate about writing clean, maintainable code and building **efficient, high-performance applications** that deliver real business impact.

TECHNICAL SKILLS

Frontend Development	Backend Development	Cloud & DevOps
• React.js, Next.js • JavaScript, TypeScript • HTML5, CSS3, Tailwind CSS • shadcn/ui • Responsive Design • jQuery, Ajax	• Node.js, Express.js • PHP (Laravel) • MySQL, MongoDB • Prisma ORM • REST APIs • Microservices	• AWS (S3, EC2, Lambda) • Apache, Nginx • Ubuntu Server • Docker • Git, GitHub • CI/CD Pipelines

AI-POWERED DEVELOPMENT TOOLS & PLATFORMS

Proficient in leveraging cutting-edge AI tools to enhance development productivity, code quality, and problem-solving efficiency:

AI Coding Assistants	Development Environments
- Claude Code (Anthropic) - GitHub Copilot - Cline (AI Assistant) - ChatGPT-4 - Qoder	- VS Code + Cline - Trae + OpenCode CLI - Antigravity + Claude Code CLI - Cursor IDE - VS Code + Gemini CLI

PROFESSIONAL EXPERIENCE

Full Stack Developer

Cloudbees Tech, Puducherry, India | Oct 2024 – Present

- Developed CrookJunk, a subscription-based food ordering platform with complete order-to-payment workflow
- Built admin panel, subscription system, and integrated Razorpay payment flow with WhatsApp-based link sharing
- Implemented webhooks and live status polling for real-time payment updates
- Designed and deployed production infrastructure using Ubuntu, Apache, Nginx (reverse proxy), MySQL, and SSL
- Engineered CbeezAI ERP SaaS with multi-tenant architecture using wildcard subdomains and scalable backend systems
- Customized and extended ERP modules including AI Assistant, Web Dialer, and WhatsApp integrations
- Built an AI-powered SLM Data Agent enabling natural language queries on MySQL databases with context-based chat
- Implemented end-to-end full stack development across frontend, backend, and infrastructure
- Contributed to HR Management System with role-based dashboards, AWS integrations, and workflow automation

MERN Stack Developer Intern

RKS Infotech, Puducherry, India | Jul 2024 – Sep 2024

- Built full-stack applications using MongoDB, Express.js, React, Node.js
- Developed responsive and user-friendly interfaces
- Learned and implemented REST APIs and backend logic
- Followed best practices in Git, coding standards, and team collaboration

KEY PROJECTS & ACHIEVEMENTS

CrookJunk — Subscription-Based Food Ordering Platform

CrookJunk is a subscription-based food ordering application that enables customers to select meal plans, manage subscriptions, and complete payments through a seamless and automated workflow.

Role: Full Stack Developer

Key Contributions:

- Designed and implemented a complete order-to-payment workflow with customer selection, subscription plans, and checkout
- Built admin-side order management system with a clean and automated flow
- Integrated Razorpay for instant payments and payment link generation

- Implemented WhatsApp-based payment flow by sending payment links to customers
- Developed webhook integration with live status polling for real-time payment updates
- Developed core modules: Customer management, Subscription package creation, Order & payment tracking
- Integrated Twilio for notifications and communication
- Set up production deployment on Ubuntu server
- Configured Apache + Nginx (reverse proxy setup)
- Managed MySQL database setup
- Implemented SSL (HTTPS) for secure communication

Technologies Used: PHP, Laravel, MySQL, Node.js, Razorpay API, Twilio API, Apache, Nginx, Ubuntu, CSS

CbeezAI ERP SaaS — Cloudbees Tech

CbeezAI is a scalable ERP SaaS platform designed to streamline business operations across domains like HR, inventory, customer management, and reporting, with a focus on automation and multi-tenant architecture.

Role: Full Stack Developer

Key Contributions:

- Set up server infrastructure using Apache and Nginx for efficient routing
- Designed MySQL database architecture for scalable data handling
- Implemented wildcard subdomain-based multi-tenancy
- Built modules: AI Assistant, Web Dialer, WhatsApp API integration
- Developed scalable APIs and ensured smooth frontend-backend integration
- Built responsive UI components for better user experience

Technologies Used: PHP, MySQL/MariaDB, Apache/Nginx, HTML, CSS, JavaScript, jQuery

SLM AI Data Agent (Natural Language Data Query System)

An AI-powered data agent that allows users to connect their MySQL database and interact with data using natural language. The system processes user queries and generates insights, reports, and structured responses without requiring manual SQL queries.

Role: Full Stack Developer

Key Contributions:

- Built the system end-to-end (frontend + backend) independently
- Designed a pipeline where user queries are processed by AI with predefined rules and constraints
- Implemented context-based chat system (up to 8 messages) for more accurate and relevant responses
- Enabled dynamic MySQL database connection and data retrieval
- Developed AI-driven reporting and insight generation

- Integrated OpenRouter for handling AI model interactions
- Built a responsive and clean UI for smooth user experience

Technologies Used: Next.js, JavaScript, Tailwind CSS, shadcn/ui, Prisma, MySQL, OpenRouter API

HR Management System — Cloudbees Tech

The HR Management System is designed to manage and automate core HR operations such as employee management, recruitment, leave tracking, training, insurance, and reporting, ensuring efficient business workflows and centralized data handling.

Role: Full Stack Developer

- As a Full Stack Developer, I worked on developing both frontend and backend modules, building scalable APIs, and designing responsive user interfaces.
- I implemented role-based dashboards with secure access control, integrated AWS services for automation and file handling, and ensured seamless data flow between the client and server.
- I also collaborated with cross-functional teams to align technical solutions with real-world business workflows.

Technologies Used: React.js, Next.js, Node.js, Express.js, MongoDB, AWS Lambda, Amazon S3, Tailwind CSS

EDUCATION

Bachelor of Commerce and Computer Application (B.COM CA)

Prist University, Puducherry | Affiliated with Thanjavur University

Duration: 2018 - 2021

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Web Technologies, Software Engineering, Operating Systems, Computer Networks, Accounting Basics, Business Management

LANGUAGES

- **English:** Professional working proficiency (Written & Spoken)
- **Tamil:** Native language
